

I LOVE MY XM RADIO!! Local radio stations are crap. C.R.A.P. I will gladly pay \$10 a month to have the variety and choice I have with XM. It's rather like cable tv versus free tv. Now the cable companies are whining about satellite, when they did the same thing 20 years ago. Regardless... this is America - competition is what it's all about. Maybe the NAB has been around way too long to remember what competition is. No wonder FM radio sucks.
